[Warranty Info](#)

WeatherWatch®

By creating a barrier at the most vulnerable areas of your roof (at the eaves and rakes, in valleys, around chimneys, etc.), WeatherWatch® Leak Barrier will help prevent leaks due to water backing up in your gutters, wind-driven rain, and damaging ice dams. It will also protect your home from expensive wall and ceiling staining from leaks.

- Code compliance and risk reduction against ice dams
- Fiberglass reinforcement helps resist wrinkling and buckling
- Self-seals around nails or metal roofing fasteners
- Split-back release film helps speed installation

SPECIFICATIONS

What is the ArmourZone™?

It's a 1¼" wide nailing surface for correct nail placement, reinforced by a tear-resistant band that provides even more fastening strength over a wider surface area of the shingle. Nails applied in this area are optimally positioned to help resist nail pull-through and shingle blow-off, even in high winds.

Nordic™ Performance Shingles

Your first concern when choosing a shingle should always be how well it can provide shelter for your family. IKO Nordic™ performance laminate shingles have that covered. They tower above most comparable shingles you can get for the money. Why? Because they're fortified with the IKO ArmourZone™ and engineered to provide superior protection against wind uplift and water penetration.

Beauty and Performance Taken to Extremes

Climate is an important factor in deciding on a shingle for your home. Is your area prone to high wind, severe storms or even hail? If so, consider investing in a total roofing solution that includes our quality IKO Nordic™ performance shingles, fortified with ArmourZone™. They were made with homes like yours in mind, offering extreme protection against the elements and extreme curb appeal.

Hip & Ridge 12™ Ridge Cap Shingles

Why waste time cutting up shingles to protect those vulnerable hip & ridge areas?

IKO has a better-looking, much easier alternative with Hip & Ridge 12™ cap shingles. They are perforated and lightweight to give you 3 pieces from one shingle, and they feature an IKO modified adhesive sealant for maximum wind protection.

Leading Edge Plus™ Starter Strips

Leading Edge Plus™ offers the latest evolution in roof starter strips. They're fast, easy and very convenient to apply. Leading Edge Plus™ starter strip "shingle" is perforated right down the middle so that you can get two starter strips out of each roof shingle. The sealant strip along their bottom edge creates a tight seal to protect shingle ends against wind damage and reduce shingle blow-offs.

Stormtite® Synthetic Underlayment

IKO Stormtite® synthetic underlayment is engineered to be used under asphalt shingles. And it has qualified as an IKO PRO4 Roofing Component. It is a cost-effective alternative to traditional #15 asphalt saturated felt, and is covered by a limited 15-year material warranty.

[Stormtite®
Brochure](#)

[Limited Warranty
Information](#)

PRODUCT SPECIFICATIONS²

| | |
|----------------------|---------------|
| Size | 250 ft x 48" |
| Qty Per Pallet | 56 rolls |
| Qty Per Unit/Package | 1,000 sq. ft. |

Stronger than felt. Stormtite® is more resistant to tearing and shredding when installers walk on it.

More flexible, even in cold weather. Stormtite® is easy to install around vents, dormers, skylights and other typical roof structures. It lays flat without curling and is super durable.

Synthetic, non-breathable material. Stormtite® effectively sheds water that gets behind shingles and it's engineered to be a vapor-retarder.

Lighter than felt. A single roll of Stormtite® contains 1000 square feet but weighs only 21.5 lb.

IKO is a family-owned business that has been operating for four generations. Their unwavering commitment to quality and innovation is your assurance of getting an exceptional product and knowing that you've made the right decision in choosing IKO for your new roof.

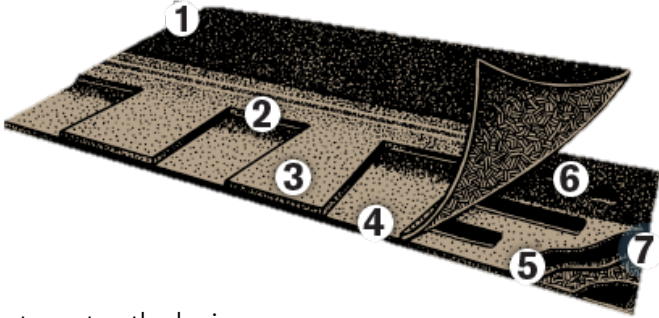

As one of the largest roofing manufacturers in the nation, TAMKO® is committed to creating beautiful, innovative products to help homeowners craft their dream roofs.

TAMKO® Shingle Starter

A precut universal starter course shingle designed to eliminate the wasted time and material of field cutting 3-tab or roll roofing materials into starter course shingles. Made of fiberglass mat coated on both sides with coating grade asphalt and surfaced with granules for protection from ultraviolet degradation.

Features

- Precut into convenient 7" x 36" strips for quick and easy installation
- Factory-applied sealant strip
- Approx. 34 shingles per bundle
- Covers approx. 102 linear feet per bundle

[Shingle Starter
Data Sheet](#)

DaVinci has been the leader in composite roofing for nearly two decades. Our commitment to creating durable, beautiful roofing tiles is unparalleled. With DaVinci, you can retain all the character your home was intended to have without worrying about time-consuming and costly maintenance. Whether you're replacing an existing roof or looking for the crowning touch on a new construction project...just leave it to DaVinci.

Manufacturer Information:

13890 W. 101st Street
Lenexa, KS 66125
800-328-4624

Warranty Information:

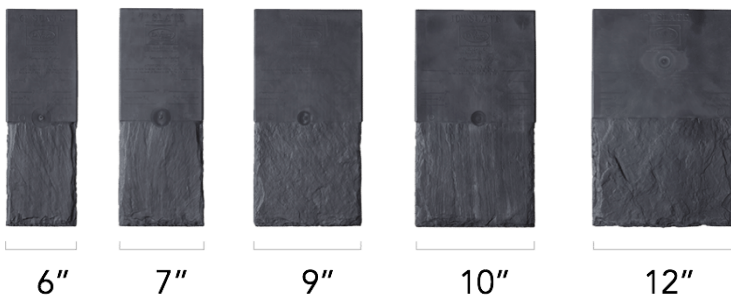

DaVinci Slate, Shake and Bellaforté have a [Lifetime Limited Material Warranty](#), which includes an industry-leading 10-year non pro-rated warranty against manufacturing defects.

Slate

Constructed of a composite material made of virgin resins, UV and thermal stabilizers as well as a highly-specialized fire retardant. The result is a state-of-the-art tile that gives us the greatest degree of color control and consistency in the manufacturing process and an end product that endures beautifully in any climate.

[Single-](#) and [Multi-Width](#)

Tech Spec Sheets: [Single-Width](#) [Multi-Width](#)

- Multi-width available in 6", 7", 9", 10", and 12" widths
- Single-width and Bellaforté available in 12" width
- ½" tile thickness
- Can be installed at 6", 7" 7½", and 8" exposure
- Modeled from actual slate for natural, non-repeating beauty
- Resistant to fading, rotting, cracking, and pests
- Tiles arrive at the job site bundled and pre-sorted for color, eliminating sorting and guesswork at the site

[Bellaforté](#)

Tech Spec Sheet: [Bellaforté](#)

Unique to Bellaforté:

- Leading edge tab secures every tile to drastically improve wind performance
- Interlocking tile creates built-in rain gutter
- Innovative design requires less overlap, making it a stylish upgrade that won't bust the budget

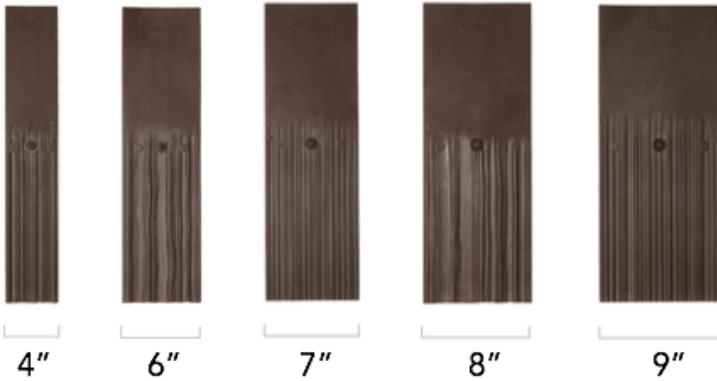

12"

Shakes

Like DaVinci Slate, DaVinci Shakes are constructed of a composite material made of virgin resins, UV and thermal stabilizers as well as a highly-specialized fire retardant. The result is a state-of-the-art tile that gives us the greatest degree of color control and consistency in the manufacturing process and an end product that endures beautifully in any climate.

Single- and Multi-Width

Tech Spec Sheets: [Single-Width](#) [Multi-Width](#)

- Multi-width available in 4", 6", 7", 8", and 9" widths
- Single-width available in 9" width
- 5/8" tile thickness
- Can be installed at 9" or 10" exposure
- Thick construction, deep grooves and realistic grain patterns combine to create dramatic shadows and visual richness
- Resistant to fading, rotting, cracking, and pests
- Tiles arrive at the job site bundled and pre-sorted for color, eliminating sorting and guesswork at the site

Bellaforté

Tech Spec Sheet: [Bellaforté](#)

12"

Unique to Bellaforté:

- Available in 12" width
- 1" average tile thickness
- 12" exposure
- Leading edge tab secures every tile to drastically improve wind performance
- Interlocking tile creates built-in rain gutter
- Innovative design requires less overlap, making it a stylish upgrade that won't bust the budget

Color Selection Guide

DaVinci offers 49 distinct slate and shake colors that are mixed to create 31 standard color blends to complement any home or building. And, there's no rule that says you have to choose one of our standard blends – create your own unique color blend by using our virtually limitless color palette.

Siding & Trim

Trim

TruExterior offers you the versatility to create virtually any custom look that you want for your homes. With the ability to cut, miter and route TruExterior Trim, you can shape your perfect profile and know your trim will outlast traditional wood.

- Better workability compared to wood, fiber cement or engineered wood trim
- Installs with standard woodworking tools and methods
- No edge sealing of cuts required
- Pre-primed and ready to paint any color
- Available in 16' lengths

Shi lap Siding

The Shi lap profile is edge-matched for a tight joint appearance. It is intended to be installed with the milled, smooth surface exposed, and is not reversible.

Woodgrain finish is available upon request.

- Durable, poly-ash material resists moisture and bugs
- Virtually no expansion or contraction due to temperature or moisture changes
- Comes pre-primed and ready for paint
- No edge sealing of cuts required
- Suitable for ground contact
- Available in 16' lengths

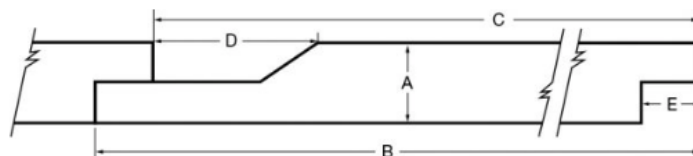

Technical Data Sheet

| Nominal Size | Actual Thickness (A) | Actual Width (B) | Reveal (C) | Tongue (D) |
|--------------|----------------------|------------------|------------|------------|
| 1 x 6 | 0.6875" | 5.50" | 5.0" | 0.50" |
| 1 x 8 | 0.6875" | 7.25" | 6.75" | 0.50" |
| 1 x 10 | 0.6875" | 9.25" | 8.75" | 0.50" |

Channel Bevel Siding

Featuring a channel-style joint with an angled edge, Channel Bevel Siding gives your arts and crafts home extra curb appeal with its attractive, layered look.

- Durable, poly-ash material resists moisture and bugs
- Virtually no expansion or contraction due to temperature or moisture changes
- Comes pre-primed and ready for paint
- No edge sealing of cuts required
- Suitable for ground contact
- Available in 16' lengths

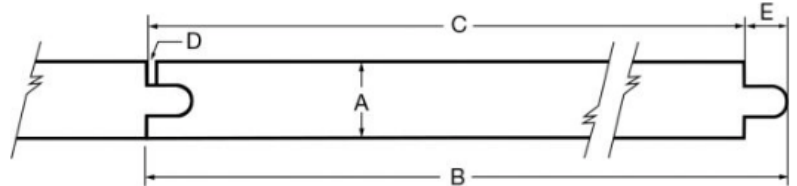

| Nominal Size | Actual Thickness (A) | Actual Width (B) | Reveal (C) | Channel (D) | Tongue (E) |
|--------------|----------------------|------------------|------------|-------------|------------|
| 1 x 6 | 0.6875" | 5.50" | 4.696" | 1.469" | 0.531" |
| 1 x 8 | 0.6875" | 7.50" | 6.696" | 1.469" | 0.531" |
| 1 x 10 | 0.6875" | 9.50" | 8.696" | 1.469" | 0.531" |
| 1 x 12 | 0.6875" | 11.25" | 10.719" | 1.469" | 0.531" |

Nickel Gap Siding

The Nickel Gap profile interlocks with a tongue-and-groove and is self-gapping, creating a consistent nickel-sized space between each board. Use it for interior or exterior applications for a trendy yet timeless look.

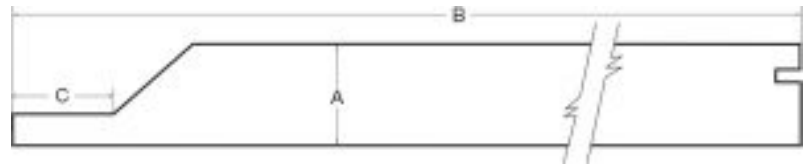

- Durable, poly-ash material resists moisture and bugs
- Virtually no expansion or contraction due to temperature or moisture changes
- Comes pre-primed and ready for paint
- No edge sealing of cuts required
- Suitable for ground contact
- Available in 16' lengths

| Nominal Size | Actual Thickness (A) | Actual Width (B) | Reveal (C) | Gap (D) | Tongue (E) |
|--------------|----------------------|------------------|------------|---------|------------|
| 1 x 4 | 0.6875" | 3.50" | 3.159" | 0.08" | 0.341" |
| 1 x 6 | 0.6875" | 5.50" | 5.159" | 0.08" | 0.341" |
| 1 x 8 | 0.6875" | 7.25" | 6.909" | 0.08" | 0.341" |
| 1 x 10 | 0.6875" | 9.25" | 8.909" | 0.08" | 0.341" |

Skirt Board

Provides a decorative yet functional way to create the required clearance between siding and grade.

| Nominal Size | Actual Thickness (A) | Actual Width (B) | Tongue (C) |
|--------------|----------------------|------------------|------------|
| 1 x 6 | 0.75" | 5.50" | 1.0" |

30-55 Year Limited Transferrable Warranty

The warranty program at Waldun is like no other program in the industry. Every warranty that is sent to our office is processed, documented, and signed in ink.

Warranty information [here](#)

Handsplit Shakes

Handsplit shakes have a split face and resawn back.

- Available in 18- or 24-inch lengths
- Shakes are available in a #1 grade, which allows a minimum of 80% edgegrain and a maximum of 20% flatgrain
- Graded in compliance to UBC 15-3 and CSA 97 standards
- Exposure to weather varies with each length or desired architectural appearance
- Offer a natural, rustic charm

Shingles

Cedar shingles have a reduced exposure to obtain a 3-ply roof system.

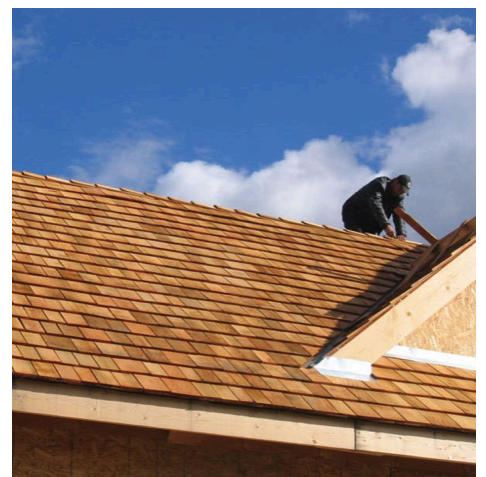

- Available in 16-, 18- or 24-inch lengths
- Top-grain shingles are 100% heartwood, 100% clear and 100% edge grain
- Shingles offer a smooth, tailored look
- All butt ends of shingles at Waldun are cut with a circular cut-off saw and have an even thickness

Tapersawn Shakes

Tapersawn shakes are sawn on both sides.

- Available in 18- or 24-inch lengths and thicknesses from 5/8" to 1-1/8"
- Shakes are available in a #1 grade, which allows a minimum of 80% edgegrain and a maximum of 20% flatgrain, or a #1 premium grade which must be 100% edgegrain
- Offer a thicker shadow line than a shingle while still enhancing a tailored, smooth style

Cedar Roofing

Handsplit & Resawn Shakes

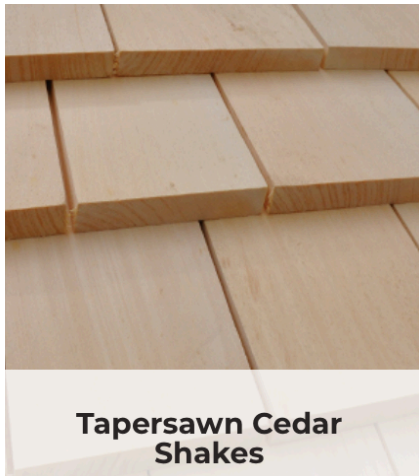

A rustic character with a country appeal. Split and then re-sawn cedar shakes are sawn on the backside while the faces of the shake are split along the natural grain of the wood. Popular on traditional, ranch, & vacation homes or non-residential structures designed to blend in with the natural surroundings.

- > Unique and natural look
- > Lowest carbon footprint of all roofing products

[PDF Brochure](#)

Warranty Information

| DIMENSIONS | PERIOD |
|------------|----------|
| 18" x 1/2" | 40 Years |
| 18" x 3/4" | 50 Years |
| 24" x 1/2" | 40 Years |
| 24" x 3/4" | 50 Years |

Tapersawn Cedar Shakes

The shingle/split shake hybrid. A Certi-Sawn red cedar shake is sawn both faces but is thicker than a shingle. The added thickness enables it to be applied as a shake, resulting in lower application costs.

- > Sawn on both sides
- > Smooth, uniform look with added durability

[PDF Brochure](#)

Warranty Information

| DIMENSIONS | PERIOD |
|------------|----------|
| 18" x 5/8" | 40 Years |
| 24" x 3/4" | 50 Years |
| 24" x 5/8" | 40 Years |
| 24" x 3/4" | 50 Years |

Cedar Shingles

The natural, tailored look. A Certi-Sawn red cedar shingle is sawn both faces and offers a more smooth, uniform look. Western red cedar shingles are a natural, luxurious, and low-carbon footprint product that have been used as a durable roofing material for over a century.

- > Slim profile for smoother look
- > Used on traditional and modern-style homes

Warranty Information

| DIMENSIONS | PERIOD |
|----------------|----------|
| 18" Perfection | 40 Years |
| 24" Royal | 40 Years |

Sidewall Cedar Shingles

Wall Shingle Sizes and Options

Watkins Rebutted and Rejoined Cedar Sidewall shingles are the ultimate luxury siding material. Many plastic and composite materials attempt to duplicate the look of cedar siding, but none of them can match the warmth and individuality of naturally grown cedar.

- > Creates an individual look for every home
- > Lowest carbon footprint

[R&R Brochure](#)

Warranty Information

| DIMENSIONS | PERIOD |
|----------------|----------|
| 18" Perfection | 40 Years |
| 24" Royal | 40 Years |

ColorSeal & Stain Finish Options

All Watkins brand cedar shingles are available with ColorSeal and stain finishes, available in oil or acrylic in a variety of custom colors, weathering options, and warranties.

- > UV protected, water repellant and mildew resistant
- > Pre-painting and staining saves time and labor costs
- > No costly scheduling, weather or seasonal delays
- > No overspray, dripping, splattering, or cleanup problems
- > Shingles are finished pre-arrival, minimizing jobsite mess
- > No color variation, lap marks, shrink lines, streaking, or dirt pickup

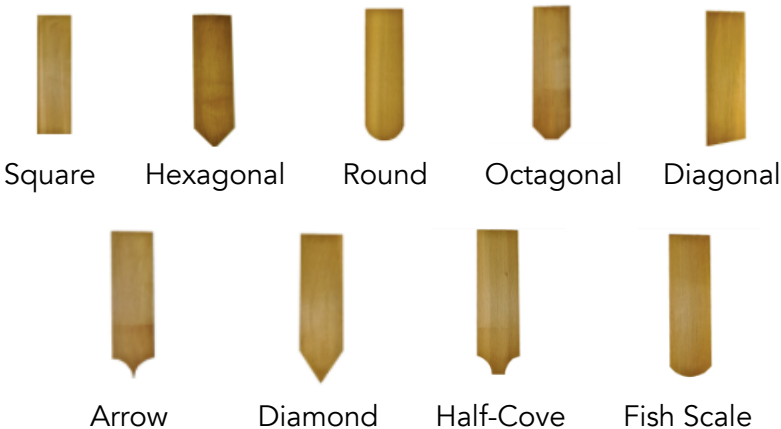

[ColorSeal Brochure](#)

Heritage Cut Designer Shingles

Heritage Cut Designer Shingles can be used as a subtle accent to break up a wall or to cover a whole home, creating a historic Victorian feel.

All shingles are 4 15/16" wide. [Product Brochure](#)

Blueskin® RF200 Ice & Water Barrier

Henry® Blueskin® RF200 is an SBS modified bitumen roofing membrane underlayment reinforced with a superior skid-resistant polyolefin surface film. The membrane is specifically designed to be self-adhered on sloped roof surfaces as secondary seal under shingles or tiles.

Features:

- Self-seals around nails and fasteners for lasting watertightness
- Fully adhered system prevents lateral moisture migration
- Premium skid-resistant textured blue film surface
- Split-back release liner for easier handling and faster application
- Shrink-wrap packaging for better product protection during storage in various weather conditions

Size

195 sq. ft.
(3 ft. wide x 65 linear ft.)

Weight

Blueskin® FortiFlash® Butyl

FortiFlash Butyl delivers in the most demanding environments, providing a strong self-sealing barrier to protect windows, doors and through-wall penetrations – as well as nonroofing conditions such as recessed windows, sill pans, pot shelves and parapets.

Features:

- High performance self-adhesive waterproof flashing membrane
- Chemically compatible with most standard sealants, as well as EPDM and flexible vinyl
- Seals around fasteners
- Asphalt free
- Split release sheet for easy integration
- Excellent low temperature adhesion

TRIM

Nail Fin Trim

Enhances your windows, doors, & gables.

Nail Fin Outside Corner

Trim your home with quality and style.

Nail Fin Inside Corner

Complete your trim package by choosing color-coordinated inside corners.

Arch Trim

Bring arched windows and entryways to life with a seamless design.

BLOCKS

Oversized, Receptacle & Universal

Designed to mount items such as exterior lighting, electrical outlets, data/network boxes, and intake/exhaust vents.

Split Block

Designed with a unique joint that protects against moisture intrusion and works with water, gas, and electrical conduit where they exit/enter the building.

Horizontal RigidMount™

Features a wide design without pre-cut holes, allowing for easy pass through HVAC piping or any mix of wall utilities.

Personalized RigidMount™

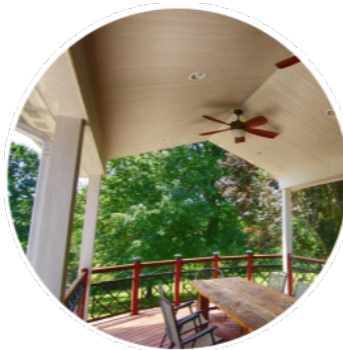

Make your house numbers be as distinctive as your home's siding with the Personalized RigidMount™ option. Choose up to five characters.

ACCENTS

Personalized RigidMount™

Make your house numbers be as distinctive as your home's siding with the Personalized RigidMount™ option. Choose up to five characters.

Pro-Post Wrap™

Set the stage with a grand entrance for your home and upgrade old peeling posts with a new Pro-Post Wrap™, or add finishing touches to a deck by wrapping pressure treated posts.

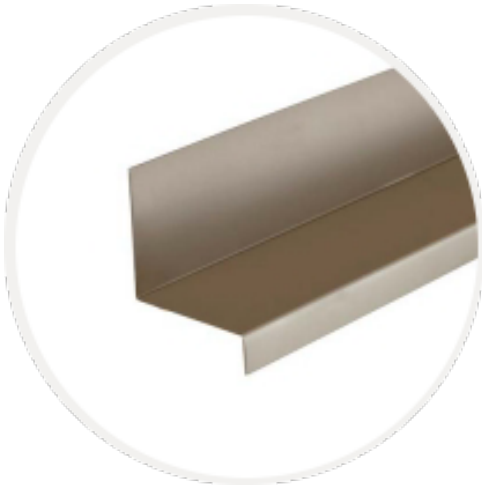

Rosettes

Consider a decorative trim accent to highlight your windows and doors. Transform your home exterior from simplistic to elegant. Enhance the era of your home with Rosettes that provide high definition curves and traditional design.

BUILT ON LP® SMARTSIDE®

WEATHERPROOFING

Drip Cap

Used above windows, doors and all horizontal band boards; drip cap is the best defense against water penetration.

Spacer Flashing

Allows for proper spacing between siding materials and roofing, decks, driveways, or sidewalks.

H-Molding

There's no need to worry about gaps between your siding. H-Moldings provide a complete, finished look.

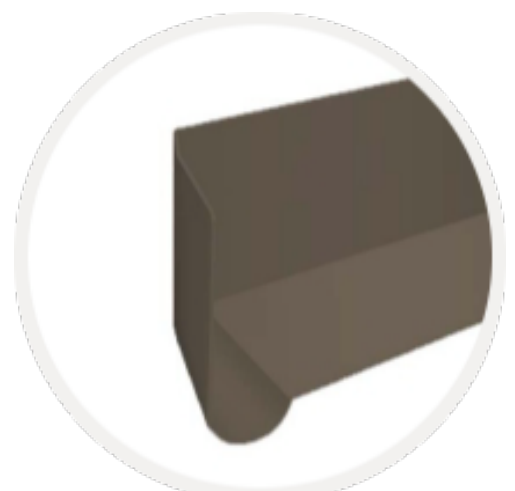

Brick Ledge Flashing

Critical component to protect your home's structure from water, used at the transition between brick or stone and siding.

Z-Flash

Designed to keep water out of horizontal seams when stacking panel siding.

Diverter Flashing

Creates an effective downward and outward water flow off the roof and away from the walls.

- Preformed to 2/12 pitch
- External water shield
- Includes 30 nails with each piece

OmniRidge® PRO Model PRO4-N

- Advanced low-profile design
- “Posi-tabs” contour to shingles for improved weather protection
- Weatherproof underlapping joint
- Six drain holes per foot per side
- Preformed to 2/12 pitch
- Includes 30 nails with each piece

Lo-OmniRoll® Model LOR-30

- Compact 30-foot roll is easy to handle
- Pneumatic nail gun or hammer installed
- Exterior convolute baffles—incurved design flexibility to roll up and out while maintaining its shape
- Two coils of 1-3/4” nails provided
- Can be cut at one-foot intervals – multiple cut lines eliminate unnecessary scrap

OW-4™ Wall Vent

- Internal aerodynamic curved baffles
- External perpendicular omni baffles
- Weatherproof underlapping joint
- Four drain holes per foot
- External venturi baffle
- Pre-formed to 3/12 pitch
- 9” Net Free Area per linear foot
- Molded-in end plug fits all roof pitches

500 Series Pan Style Static Vent

Features

- Includes 8x8 perma-coated screen for added protection
- Flange on vent stack for superior weather protection
- Available in tall throat design

Finally, a pipe boot **Built to Last®**

Featuring the **TightLOCK® TOP** that grips the pipe and forms a weather-tight seal.

Place it, Turn it, Done.

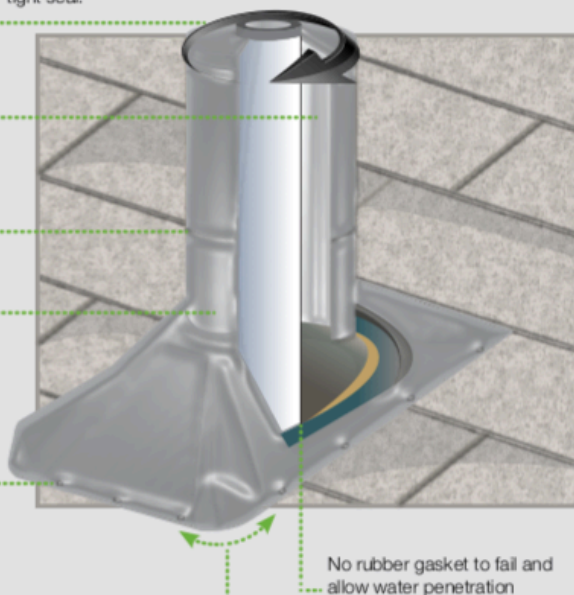

Air space allows air circulation to resist frost from closing vent.

Telescoping sleeve allows for varying pipe heights as well as roof expansion and contraction.

Available for 1½", 2", 3" and 4" pipe sizes.

Raised nail bosses for easy installation.

Easily adjustable base with pinch & push corners.

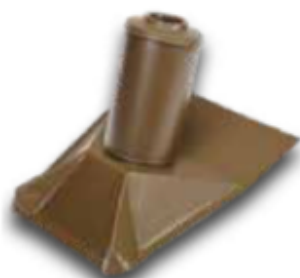

Pipe Boot

The Quarrix Pipe Boot is an all-steel weatherproof pipe flashing that protects against plumbing vent leaks through extreme weather conditions for the life of the roof.

The Quarrix Pipe Boot's TightLOCK® Top grips the pipe and forms a weather-tight seal for a faster install. Telescoping sleeve allows for varying pipe heights, roof expansion and works to combat frost in cold climates.

Weathermaster™ Sealant

Features & Benefits:

- Outperforms silicone, tripolymer and urethane sealants
- Superior polymer technology
- Applies easily in extreme weather conditions
- Fills gaps up to 1 inch wide
- Permanently flexible, weather-tight seal
- UV-resistant
- Mold and mildew resistant
- VOC-compliant
- Can be painted with water-based (latex-based) paint one hour after application
- Compatible with all types of foam

Quad® Calking

QUAD is the preferred cold water sealant for sealing around exterior windows and doors, fiber-cement and vinyl siding, PVC trim, roofing and gutters.

It bonds without a primer to most common substrates like cedar, painted or stained woods, fiberglass, vinyl, coated aluminum, steel, metal, brick, masonry and concrete.

Features:

- All-weather, superior performance
- Permanently flexible with 3x stretch
- 20°F - 120°F application
- Wet surface application
- UV- and water-resistant - will not yellow or crack
- Resists dust & dirt collection
- Paintable
- 4" professional spout

Quad® Max

QUAD MAX siding & window sealant is designed for sealing around interior/exterior windows, doors and siding.

It bonds to a wide variety of materials without need for a primer such as fiber cement, cedar, brick, stone, coated aluminum, fiberglass, vinyl, PVC, stucco, EIFS, wood, glass, and flashing tapes and Kynar coatings.

Features:

- Proven wet surface application
- Better flexibility: 5x stretch & 50% joint movement
- Consistent bead in hot or cold temperatures: 0°F to 140°F application
- 24 hour fast cure for quicker protection
- Paintable in 1 hour
- Strong adhesion to more building materials without primer
- Enhanced UV resistance
- Now available in sausage packs

OSI Quad® Foam

Window and Door Insulating Foam Sealant

QUAD Foam is part of the QUAD Window & Door System and is used to insulate and seal around windows and door frames.

It can also be used for jambs, mud sills, header joints, corner joints, top plate penetrations, electrical and plumbing penetrations and other areas where air infiltration or heat loss may occur.

Bonds most building most including vinyl, aluminum, fiberglass, wood, OSB, PVC, concrete metal.

Features:

- Low pressure/low expansion – will not warp or deform windows and doors
- Quick setting formulation – can be cut or trimmed in less than 1 hour
- Cold temperature application (14°F)
- Insulation value R5/inch
- Closed cell structure does not absorb moisture
- Flexible/will not crack or dry out

VELUX Warranty

- 10 Year "No Leak" Installation Warranty
- 10 Year Hail Breakage Warranty for Products with Clean, Quiet & Safe Glass

Fixed Skylights (FS/FCM)

Features & Benefits

- Clean, Quiet & Safe Glass

Much smoother than ordinary glass, so water disperses evenly and evaporates quickly, greatly reducing water spotting. Reduces unwanted outside noise by up to 25% less than a standard double pane glass, and up to 50% less than a plastic skylight.

- Daylight

Adding daylight to a home is essential to health and well-being.

- No Leak Promise

Carries a 10-year installation warranty, plus 20 years on glass, 10 years on product, and 5 years on blinds and controls

"Fresh Air" Skylights

Manual (VS) | Solar Powered (VSS) | Electric (VSE)

Manual

Features & Benefits to All

- Clean, Quiet & Safe Glass
Much smoother than ordinary glass, so water disperses evenly and evaporates quickly, greatly reducing water spotting. Reduces unwanted outside noise by up to 25% less than a standard double pane glass, and up to 50% less than a plastic skylight.

- Fresh Air
Adding fresh air and ventilation to a home is essential to health and well-being.

- No Leak Promise
Carries a 10-year installation warranty, plus 20 years on glass, 10 years on product, and 5 years on blinds and controls

Variations Offered

VS – Deck Mounted
C04, C06, S06

VSS/VSE – Deck Mounted
M04

Unique Features and Benefits

VS

- Manually Operated
Easily opened and closed with VELUX control rods. No need for costly wiring or electricity.

VSS

- Solar Powered
Remote controlled, solar powered skylight requires no wiring, which makes for easy and cost effective installation.

VSE

- Standard Hard Wire
Single 20' hard wire connects to a standard junction box.

VSS & VSE

- Rain Sensors
With the integrated rain sensor, the skylight will close automatically if inclement weather approaches.

Energy Guard High-Performance R5-Plus

Energy Guard High-Performance R5-Plus windows from Thermo-Tech are the new standard for maximum energy savings, superior performance and beauty. High-quality materials, superb construction and triple-pane, argon-filled glass combine to make Energy Guard windows some of the most energy-efficient windows available today.

- 100% virgin super-insulating polyvinylchloride
- High-performance LoE³™ 366 on two glass surfaces
- Fusion-welded corners enhance strength and durability
- Three panes of double-strength glass provide superior energy efficiency and greatly increase the comfort level of your home
- Warm-edge space system for durability and maximum energy efficiency
- Chambers create insulation air pockets for superb energy efficiency and stability
- ½-inch argon-filled air spaces between frames for optimal insulation and sound proofing

Explore styles [here](#)

Northern Elevations

Solid construction and superior design are just where we start. Northern Elevations windows incorporate 3 layers of double-strength glass and two half-inch argon-filled insulating airspaces for an overall insulated glass thickness of 1-3/8 inches – nearly twice as thick as standard insulated glass. Add in the PVC vinyl multi-chambered frames and you’ve got energy efficiency and durability that simply can’t be matched by standard insulated windows.

- Triple-pane glass provides up to 40% better thermal performance than dual-pane options
- Superior grade weather strip blocks infiltration of outside air
- Double-layer coating of high-performance LoE on two glass surfaces
- Exceeds highest standards of ENERGY STAR®
- BetterVue® screen for increased airflow and a clearer view
- 4-9/16 inch multi-chambered frame for improved strength and performance

[Product Catalog](#)

Doors

At Thermo-Tech, we build exceptional quality into all of our patio doors. It's the kind of quality that homeowners can see in the cost-saving energy efficiency, in the exceptional safety and security, and in the durable style details. Thermo-Tech patio doors are made with strong, premium-grade materials that keep the weather outside and comfort inside. They're also easy to operate and clean inside and out. In fact, they require very little maintenance throughout the year for grand openings decade after decade.

For more than three decades, Seal-Rite has been committed to aiding its customers in growing their business through innovation, technology, quality, and service.

Classic-Craft

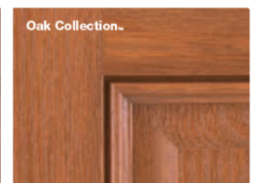

From simple lines to elegant arched panels, each Classic-Craft collection makes the most of rich, textured wood grains, on-trend tones and premium smooth, paintable doors. Close attention to architectural detail and superior styling make these units a perfect fit for your front entryway.

View collections [here](#)

Fiber-Classic

This is the door that created an entirely new class of energy-efficient fiberglass entryway products. Fiber-Classic collections deliver the look and feel of real mahogany and oak with excellent value. Combine that with a range of sizes that allows you to add a touch of class to any space.

Smooth-Star

Homeowner preference for contemporary styling is still on the upswing. Smooth-Star doors achieve crisp lines and high-definition embossments in a ready-to-paint, smooth fiberglass surface. Versatility blends with smooth contours to provide a fit for nearly any type of opening.

View offerings [here](#)

Steel

Designed to bring style, safety and affordability together, steel doors deliver a distinct feel that many have grown to respect. They provide rigidity, stability and security with classic panel designs and shadow lines for built-in appeal. Steel doors provide the basic utility you require in a door, while keeping your budget in mind.

Windows

ProVia has developed a competitive position by catering to a niche within the home replacement window market that demands a high degree of customization coupled with outstanding quality. Our custom windows are built to be the best in the market. We define the custom windows that meet this demand as “professional-class.”

Endure™

For the energy-efficient Endure™ vinyl window line, ProVia has chosen the optimum levels of technology to make a window that will work continually at peak performance. Endure™ windows provide all that you would expect from high-performance ENERGY STAR certified vinyl windows, using much less energy to stay warm in the winter, cool in the summer, and to provide comfort all year round.

[Styles & Options](#)

[Features & Specs](#)

Aspect™

The Aspect™ window series is ProVia's answer for discerning consumers seeking a better-quality home window that outperforms other mid-range vinyl windows. Aspect™ offers an extremely durable and energy-efficient construction, with an innovative, multi-chambered frame and sash design, triple weatherstripping and ComforTech™ Warm Edge Glazing, a high-tech glass package that measurably improves thermal performance—for less heat loss, warmer glass temperatures and reduced interior condensation.

[Styles & Options](#)

[Features & Specs](#)

ecoLite™

Launched in September 2015, ProVia®'s ecoLite™ window series provides the right combination of sturdy construction and energy efficiency, making it the best vinyl window option on the market in the category of economy-class windows. These U.S.-made white vinyl windows are available in five styles and are ideal for both single family and multi-family homes as new construction or replacement windows. ProVia's ecoLite™ windows are offered with privacy glass and grid options utilizing ProVia's MasterFit™ interior trim system.

[Styles & Options](#)

[Features & Specs](#)

Aeris™

Aeris™ residential windows are uniquely engineered through a patented system that fully integrates real wood interiors with maintenance-free vinyl exteriors. This system was designed specifically for homeowners who want the best wood and vinyl replacement windows and who value the warmth and beauty of wood that can be stained, sanded and re-stained or painted. The insulated framing on the Aeris™ window interiors offers superior construction to wood replacement windows and provides you with the comfort of knowing you have one of the most durable, beautiful and energy-efficient windows systems available.

[Styles & Options](#)

[Features & Specs](#)

Aluminum Storm Windows

Custom built to your specifications with heavy-duty extruded aluminum, ProVia storm windows offer the most in energy efficiency, weather protection and noise reduction. ProVia aluminum storm windows are available in 16 beautiful colors, complementing any style home. Low-E and other glass options increase energy savings.
